Nature Recovery Zones

Today's map is all about Gloucestershire Wildlife Trust's Nature Recovery Zones!

Each Nature Recovery Zone is mapped out as a polygon, highlighting special places where nature can thrive.

For over 60 years, Gloucestershire Wildlife Trust has protected special places and species, yet wildlife continues to decline.

Nature reserves alone are often too small to protect species long-term.

Nature Recovery Zones tackle this by working with landowners and farmers to expand, improve and connect habitats, creating bigger, better, more joined-up, 'super reserve' areas for wildlife.
